

Heard about teaching for mastery? Interested in high quality professional development?

**£2,000
funding
available!**

WHAT IS INVOLVED?

This Work Group is the first year in the NCETM's Teaching for Mastery Programme that will support schools in developing a teaching for mastery approach. Participating teachers will have the opportunity to see teaching for mastery in practice through the observation of live lessons and take ideas to implement in their own classroom. Each school will have their own designated Mastery Specialist. For the first time in 2023/24, we are offering the opportunity for teachers who work in special schools to come together to join a regional cross-phase TfM Development Work Group.

WHO CAN TAKE PART?

This programme is for state-funded secondary schools in England. Mastery Advocates should be teachers with the commitment, experience and authority to lead developmental work across a maths department. The support of the Head of Maths, and the headteacher or a member of SLT, is also essential.
